

Anti-Icky-Poo

This exciting product attacks and removes persistent odors caused by urine, feces, vomit, smoke, char, dead body, and many other organic based odors from carpets, upholstery, tile, walls, clothing, sleeping bags, urinals, floor drains and more.

The **Anti-Icky-Poo** formula is composed of specially-bred enzyme/bacterial cultures that actually attack and breakdown protein molecules like nothing else before. It does its job by digesting the source, just the way nature does it... but does it in minutes rather than days or weeks, with zero environmental impact.

Until now, it was not widely available. Your customers can have this amazing product for use in their home or business. Most have tried everything from carpet shampoos to vinegar and nothing works. **Anti-Icky-Poo Works.** Because a significant number of inappropriate eliminators repeat often, your customers will come back again and again. But it's not only for pet odors. **Anti-Icky-Poo** works on any decaying bacteria, even mold, spores and mildew. **VetWorld Companies, Inc.** is proud to represent this product in Europe, the United States, and Worldwide.

Made in the U.S.A.

Anti-Icky-Poo Works GREAT

CARPET AND UPHOLSTERY

Simply pour on and allow to dry. Anti-Icky-Poo simply evaporates and leaves no residue behind.

FABRIC, BEDDING, SLEEPING BAGS AND OTHER WET CLEANABLE OBJECTS

Odors can be removed from these items in a manner similar to carpets and upholstery. Remove as much contamination as possible by hand or by machine, then spray Anti-Icky-Poo on the fabric and allow to dry. More than one application may be necessary.

ON HARD SURFACES SUCH AS TILE, SINKS AND WALLS

Clean the surface in the normal manner then spray on Anti-Icky-Poo and allow to dry.

IN KENNELS AND ANIMAL SHELTERS

Clean the floor and cages then lightly spray Anti-Icky-Poo on the surface. It may be diluted up to 4 to 1 with water when using it on hard surfaces such as tile. While Anti-Icky-Poo is not a dangerous chemical, it is NOT DESIGNED OR APPROVED TO SPRAY ON PETS.

IN PORT-A-TOILETS AND OUT-HOUSES

Pour right over the icky stuff and allow to dry.

Anti-Icky-Poo has also been shown to be effective in treating mold, mildew and spores.

WHY ANTI-ICKY-POO WORKS BETTER THAN ANYTHING ELSE

NOT AFFECTED BY DISINFECTANTS AND OTHER CHEMICALS

Many enzyme products on the market today fail because they are destroyed by previous applications of other chemicals such as disinfectants. The unique formulation of this product prevents this from happening. A "slime layer" is built around the Anti-Icky-Poo molecule which protects it from quaternary, phenolic, and other high pH chemicals. Consequently, Anti-Icky-Poo keeps working while others die on the vine.

INSTANT RELIEF

When urine is deposited and allowed to remain, gasses are given off in the form of sulfur, ammonia, and methane. As you apply Anti-Icky-Poo it instantly neutralizes these gasses so that it gives instant relief.

DOES NOT ADVERSELY AFFECT THE NEW STAIN RESISTANT FIBERS

Many new carpets are factory treated to resist acid base stains. This treatment can be chemically affected by some cleaners and detergents on the market. However, Anti-Icky-Poo is safe on these fibers and will not affect the treatment. Its pH is 6.5 and is anionic.

DOES NOT NEED TO BE WET TO WORK

Some enzyme deodorizers only work while they are wet. Anti-Icky-Poo keeps working wet or dry.

LONG SHELF LIFE

Because of its unique formulation it remains stable in the container for a minimum of two years. It is protected in a temperature range of -10 degrees to 240 degrees F.

VERY SAFE TO USE

Anti-Icky-Poo contains no acids, caustics, or solvents. As with all chemicals, it is good to follow all label directions. It is certified to be free of all pathogenic organisms such as salmonella. The label on Anti-Icky-Poo states "Keep out of reach of children, and rinse hands after use."

READY TO USE

Anti-Icky-Poo is ready to use right out of the container. It needs no mixing. However, for large areas that are not very severe, it may be diluted up to one part Anti-Icky-Poo to four parts of water.

MANY OTHER USES

Anti-Icky-Poo works great on upholstery, mattresses, sleeping bags, tile, sinks, drains, kennels, animal shelters, out-houses, and more.

Useful In...

- Animal Behaviorists
- Upholstery Cleaners
- Hotel Maintenance
- Home Improvement
- Veterinary Clinics
- Carpet Cleaners
- Environmental Cleanup
- Mold Removers

SPECIAL TIPS USING ANTI-ICKY-POO

A big smell usually comes from a small spot. Locate that spot. If it's visible, you're half way there. If it is not, start looking in the corners. In 90% of the cases, animals urinate in the corner. If you are able to lift the carpet, spray both sides as well as the padding and floor, if necessary. In fact, spray everything that appears to be contaminated. This may include walls, curtains, hearth, etc. if you are not able to lift the carpet, inject it using a large veterinary type syringe. Ask about our blacklights for identifying the source of the problem or our electronic sensors for an audible alert when moisture is present.
