

## Important Announcement

# Swine Flu H1N1

Safe4 Disinfectant has been tested by the Scientific Services Unit Veterinary Laboratories Agency (VLA).  
**The VLA is an executive agency of the Department for Environment, Food and Rural Affairs (Defra).**  
Addlestone, Surrey, United Kingdom.

**Safe4 Disinfectant has been found to be effective against H1N1 (Swine Flu) at a dilution of 1:20.**

Safe Solutions requested this test as a result of the Defra Policy Statement of 6th May 2009.

*“The H1N1 virus associated with the human cases of influenza in Mexico and other countries has the most characteristics (but not identical to so far) of strains of influenza viruses found in pigs. This means that presently no disinfectant has been specifically approved as efficacious in the control of this H1N1 virus.”*

This test was specifically performed by the VLA during June 2009 to ascertain Safe4 Disinfectant's efficacy against H1N1 and is not based on assumptions as used by some other disinfectant manufacturers in their claims.

If you require sight of the VLA test certificate you can do so by contacting Safe Solutions on:

**CERTIFICATE OF ANALYSIS**  
**Disinfectant Efficacy Test**  
**Against H1N1 Influenza A Virus**

<b>Supplier:</b>	<b>Product:</b>	Safe 4 Disinfectant (KL179)
Safe Solutions (DBG) Limited	<b>Batch Number:</b>	21106
Bostock Road	<b>Expiry Date:</b>	15 April 2011
Winsford	<b>Date Received:</b>	27 May 2009
Cheshire	<b>VLA Sample Reference:</b>	MS245/09
CW7 3BD	<b>Test Method Reference:</b>	QCU0483
	<b>Date On Test:</b>	04 June 2009
	<b>Date Off Test:</b>	12 June 2009
	<b>Certificate Number:</b>	H1N1/09/01

**TEST REPORT**

**Toxicity Test Results**

Test Dilution	Result
1:5	PASS
1:10	PASS
1:20	PASS
Negative Control	PASS

**Disinfectant - Virus Test Results**

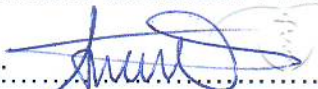

**Specification:** To pass the test the diluted disinfectant must reduce the titre of the virus by  $\geq 4.0$ .

Dilution	Virus Titre	Reduction	Conclusion
1:5	$\leq 0.19$	$\geq 5.51$	PASS
1:10	$\leq 0.19$	$\geq 5.51$	PASS
1:20	$\leq 0.19$	$\geq 5.51$	PASS
Positive Control	$\geq 5.70$	N/A	PASS

**CONCLUSION**

Disinfectant Safe 4 Disinfectant (KL179) was non-toxic to the test system and demonstrated efficacy against H1N1 Influenza A Virus at all of the dilutions tested.

**Note.** This test **does not** constitute Defra approval for the use of the disinfectant against H1N1 Influenza A Virus.
